

High ambient, low-noise Engine Utility Cooler

Integral Day Oil & Waste Oil Tanks

Cold/Warm Air Mixing Valve for maximum engine performance at any ambient temperature

Overhead Lifting System for routine engine maintenance

Proven Caterpillar & Waukesha Natural Gas Engines from 740 to 1,150 BHP

Low-noise Engine Exhaust Silencer

Low-noise building design with Removable Roof Sections for engine and compressor overhaul access

Start, Fuel, Engine Oil & Compressor Oil Filtration Systems for extended maintenance intervals

Building Heaters for low ambient temperature installations

Onboard Power Generation & Battery Backup for Included Building Lighting, Fire and Gas Detection

Fully automated Compressor Control System for stand alone operation

Simple six-point Leveling System

Large, roomy Pull-outs for complete walk-around maintenance access

Industry-standard Ariel Single, Two & Three Stage Reciprocating Compressors or Rotary Screws available with optional 5% H2S design

Automatic Speed, Recycle, Suction Pressure & Blowdown Control

Oilfield-tough Air-ride Suspension Trailer for reduced equipment wear and tear

High ambient, low-noise Process Gas Cooler
